

## Roof Redesign AR33xx Series Cabinets

In 2010 the roof of all AR33xx cabinets (except AR3340 and AR3347) were redesigned to add brushes and close off most of the open space to reduce leakage in HACS installations. This Skus for the cabinets and replacement roofs did not change with the new design.

A customer adding new AR33xx series cabinets into an existing installation may receive cabinets with roofs that are different from the AR33xx's that they originally purchased. And for a short period of time in 2010 customers may receive shipments with a mixture of the older and newer style roofs. The original design isn't bad or wrong, it's just an older design. Anyone wanting to change roofs for visual continuity should purchase replacement roofs under Sku AR7211 (600mm) or AR7212 (750mm). These will be the newer design.

**The original roof design is no longer available.**
